## *Adjustable RIMSEAT with Handles*

Even though the Seat setup is self-explanatory, here are simple guidelines.

- 1) Remove the Seat's cardboard sleeve, plastic bubble wrap and bag.
- 2) Unwrap the two legs and handle sleeves
- 3) Flip the seat upside down so that the two leg brackets containing the snap buttons are up.
- 4) Insert the two legs by lining up the holes until the buttons snap out
- 5) Adjust the height so that both legs are evenly positioned on both sides.
- 6) Flip the Rim Seat on its legs and insert the two vinyl sleeves on the handles.
- 7) With no one sitting on it, adjust the legs evenly to the desired height by pushing on the snap buttons (figure 2).

Please Note:

- The Plastic toilet seat is replaceable (visit our web site)
- Use soap and water to clean the plastic seat or you may scratch it.
